the most essential changes and improvements;— the first model having had the Cap of Liberty on the left hand, which gave the figure a rather heavy appearance. As it shows now, it is at once more elegant and more maginative. The left foot is a little in advance of the other-and it is this part of the figure which the sculptor conceives ta been somewhat misunderstood. What he desired to represent was, 'America' trampling under foot, not monarchical power, but tyranny an idea which he imagines an English sculptor might consistently adopt and represent. In the first design he attempted to do this by placing a diadem under the left foot; but fearing that he meaning might be misapprehended, he has re-placed the diadem by a sceptre with chains re-neath it. The statue, which is half covered with drapery, will be foorteen feet high; and for power, Beauty, combined, it is one of the firest that I have seen in Italy. Powers is about to commence working it out in marble, and calculates that in fifteen months it will be ready for sending off. I her dwelt at length on this subject, not only be cause of the great merits of this work of art, but because, as I have seid, the sculptor cousiders his design to have been misconceived, and seemed anxious to have his meaning clearly expressed. "By the side of the beautiful model of America. stood a yet half-developed statue of 'California.'

a good cause, and are refoted, it is a common er-ror for men to suppose that the contrary side of the question is established. The point at issue is yet untouched. To show the inconclusiveness of an argument to adduce one upon the opposite side of stion. It is very important is to introduce but few arguments, and an advantage of the well. In war, Philip, of Macedon, and Afexander the Great owed their success to the introduction of the phalanz. Napoleon gained his victories by concentrating his forces upon a single point.

Battoon Ascension .- A Mr. Orlandi made a balloon ascension at Barcelona, Oct. 27. As no news was obtained of him for two days, great uneasiness was felt left he should have shared the same fate as Monsieur Arban.—He had, however, a very narrow escape with his life. The balloon was wafted over the snow covered mountains of Vallvidrera, where it was enveloped in a thick mist, now and then pierced by lightning. The intrepid aronaut was covered by thick coatings of hail, that incessantly fell. Having ascended above the clouds, he caught a glimpse of the sun. and seeing that the wind changed in a southwest-erly direction, he resolved to descend to the earth,

which he could not in the least distinguish.

The wind drove the balloon with terrible velocity, and at last it fell into the sea, where Mr. Orlandi, holding fast by the ropes, managed to keep himself above water during three hours, when he was washed on shore at ten at night, his balloon being carried out to sea again. After 2 hours spent on the cold sand, he recovered his strength sufficiently to get up and look for shel-He was stopped by one of the coast guards, who had like to have been shot as a smuggler or bandit, but who recognizing him as the man of the balloon, (at bombre del globe) took him to a village and put him to bed. MOFFATS

Life Pills and Phoenix Bitters.

These Medicines have now been before the public for a period of PIFTERN YRARS, and during that time have maintained a high charac-ter in almost every part of the globe for their extraordinary and immediate power of restoring per-

kind of disease to which the human frame is liable. IN MANY THOUSANDS

feet health to persons suffering under nearly every

of certificated instances, they have even rescued sufferers from the very verge of an untimely grave, after all the deceptive nestrums of the day had utterly failed; and to many thousands they have permanently secured that uniform sajey-ment of health, without which life itself is but ment of heatin, without which indeed, has their a partial blessing. So great, indeed, has their efficacy invariably and infallibly proved, that it has appeared scarcely less than miraculous to those who were acquainted with the beautifully pounded, and upon which they are com-pounded, and upon which they are com-pounded, and upon which they consequently act. It was to their manifest and sensible action in purifying the springe and channels of life, and an

purifying the springs and channels of life, and anduling them with renewed tone and vigor, that they were indebted for their name.

Unlike the host of permicious quackeries which heast of vegetable ingredients, the LIFE MEDICINES are purely and solely vegetable; and contain neither Mercury, nor Antimony, nor Arsenic, nor any other mineral, in any form whatever • They are entirely composed of extracts from rare and powerful plants, the virtues of which though long known to assert leading the property of the street o of which, though long known to several Indian tribes, and recently to some eminent pharmages. tical chemists, are altogether unknown to the isporant pretenders to medical science ; and were never before administered in so happily efficacious The first operation is to lossen from the coats of the stomach and bowels the various impuri-ties and crudities constantly settling round them ;

and to remove the hardened faces which collect in the convolutions of the small intestines. Other medicines only partially cleanes these, and leave such collected masses behind to produce habitual Costiveness, with all its train of evils, or sudden Diarrhea with its imminent dangers. This fact well-known to all regular anatomists who examine the human bowels after death ; and hence amine the human bowels after death; and hence
the prejudice of these well-informed men against
the quack medicines of the age. The second
effect of the VRGETABLE LIFE MEDICINES is to cleanse the kidneys and the bladder; and, by this means, the liver and lungs,
the healthful action of which entirely depends
upon the regularity of the urinary organs. The blood, which takes its red color from the agency

of the liver and lungs, before it passes into the beart, being thus purified by them, and nourished by food coming from a clean storach, courses freely through the veins, renews every part of the system, and triumphantly mounts the bauner of health in the blooming cheek. The following are among the distressing va-rety of human diseases in which the VEGE-TABLE LIFE MEDICINES are well known DYSPEPSIA, by thoroughly cleaning the
